

Marc-Olivier Buffle, PhD, Senior Equity Analyst

Marc-Olivier Buffle is a Senior Analyst in SAM's research team covering the water industry and technology sector, bringing 12 years of related industry experience. Prior to joining SAM in 2008, he was a business development manager at the Danaher Corporation where he led the market development efforts for advanced water treatment products. Previously, he was a team leader in the research and development (R&D) department of Trojan Technologies, a global water treatment technology manufacturer. Marc-Olivier Buffle has published numerous articles in peer-reviewed water treatment and environmental science publications, is the recipient of several awards for his work in the field of ozone research, and has patented various processes in water treatment technology. Marc-Olivier Buffle holds an MSc in Engineering from the Swiss Federal School of Technology (ETH) and a PhD in Water Treatment Chemistry from the Swiss Federal Institute of Aquatic Science and Technology (EAWAG).
